SUMMARY

Full Stack Developer with 2+ years of experience building web applications using React.js, Node.js, JavaScript, TypeScript, and PostgreSQL. Experienced in end-to-end development from UI design to deployment using Supabase and Dokploy. Currently developing SaaS applications for Australian taxation processes, with expertise in scalable architecture, responsive interfaces, and AI-assisted development.

SKILLS

Frontend: React.js, Zustand, TanStack Query, JavaScript, TypeScript, HTML, CSS, Tailwind, Bootstrap

Backend: Node.js, Express.js, REST API design, Supabase

Databases: PostgreSQL

Tools & Technologies: Git, GitHub, Jira, Visual Studio Code, Dokploy, n8n

AI Tools: Claude Code, Claude Design, Codex, Antigravity, Google Flow, Google Stitch, Lovable.dev

EXPERIENCE

MuleCraft India Pvt. Ltd. - Full Stack Developer - 04/2026 - Present

Tech Stack: React.js, Node.js, JavaScript, TypeScript, PostgreSQL, Supabase, TanStack Query, Zustand, n8n

- Developed a multi-role AU Tax Practice Management from scratch, architecting secure client data and document workflows with multi-layer encryption and optimized file compression that reduced document size by ~50%, lowering storage requirements and associated costs
- Built an E-cycle management platform from the ground up, architecting role-based workflows for quote and agreement generation, worksheet management, and dual-role operations while optimizing data-query handling for responsive, reliable application performance.
- Architected custom n8n workflows that automated AI-powered content generation from prompt to publication, eliminating manual intervention and streamlining the end-to-end content publishing workflow.
- Developed an n8n lead generation workflow integrated with the Linked Guest API to automate LinkedIn lead extraction.

Bluewhiz Infotech Pvt. Ltd. - Frontend Developer - 08/2024 - 04/2026

Tech Stack: React.js, JavaScript, Bootstrap, Tailwind, ChakraUI, HTML, CSS, Supabase, PostgreSQL, Zustand

- Optimized frontend performance through lazy loading, code splitting, and client-side caching, reducing initial load time by 35% and improving application responsiveness across devices.
- Optimized image delivery by converting assets to WebP and implementing responsive image sizing and lazy loading, reducing image payload size by ~40% and improving page load performance across devices.
- Developed high-performance React.js applications using Zustand and component-based architecture, building modular, reusable interfaces focused on scalability and responsive user experiences.

Slash Mark IT Solutions Pvt. Ltd. - Full Stack Developer Intern - 11/2023 - 02/2024

Tech Stack: HTML, CSS, JavaScript, Bootstrap, React.js, Tailwind

- Developed responsive web interfaces using React.js, JavaScript, Tailwind CSS, and Bootstrap, applying component-based development to build reusable and maintainable UI features.
- Integrated APIs into frontend workflows, handling data retrieval and application interactions to support dynamic, user-driven functionality.

PROJECTS

BetterBukz - AU Tax Practice Management

Tech Stack: React.js, Node.js, Supabase, PostgreSQL, TypeScript, Tailwind, Zustand, Zod, TanStack Query

Company: MuleCraft India Pvt. Ltd.

- Solely engineered the web application from design through development and deployment, implementing RBAC for role-specific workflows and secure access to sensitive client and financial data.
- Implemented multi-layer encryption and secure data-handling mechanisms to protect sensitive client information across the application.

WaaRec - AU E-Waste & Recycling Management

Tech Stack: React.js, Node.js, Supabase, PostgreSQL, TypeScript, Tailwind, Zustand, Zod, TanStack Query

Company: MuleCraft India Pvt. Ltd.

- Developed core workflows for quote and agreement generation, worksheet management, and dual-role operations, translating business requirements into scalable application functionality.
- Integrated email functionality to support automated application-driven communication and workflow notifications.

Lead Generation Automation

Tech Stack: n8n, JavaScript, LinkedIn Guest API

Company: MuleCraft India Pvt. Ltd.

- Orchestrated the end-to-end lead generation workflow in n8n, connecting external API services to create a repeatable automated lead acquisition pipeline.

AI-Powered Content Automation

Tech Stack: n8n, JavaScript, OpenAI API, Prompt Engineering

Company: MuleCraft India Pvt. Ltd.

- Architected custom n8n workflows to automate AI-powered content and Image generation from prompt to publication, eliminating manual intervention across the end-to-end publishing workflow.

Servewhiz - Business Operations Platform

Tech Stack: React.js, Supabase, PostgreSQL, JavaScript, Tailwind, Zustand

Company: Bluewhiz InfoTech Pvt. Ltd.

- Led frontend development, optimized application image assets using compression and responsive loading techniques to reduce image payload and improve page performance

TeethEase Academy - Online Education Platform | [Link](#)

Tech Stack: React.js, Supabase, JavaScript, Tailwind, Zustand

Company: Freelancing

- Engineered the complete frontend for an online NEET MDS learning platform, translating complex learning workflows into responsive interfaces for live classes, recorded lectures, MCQs, quizzes, and mock tests to deliver a seamless student learning experience.

Education

Bachelor in Computer Applications | CGPA - 8.2

Adhiparasakthi College of Arts & Science | 2021-2024

Certificate

JavaScript: The Hard Parts, v3 | Frontend Masters

Introduction to agent skills | Anthropic

Claude Code in Action | Anthropic

Introduction to Claude Cowork | Anthropic

Claude 101 | Anthropic
